1.0 INTRODUCTION

The Yurok Tribe Environmental Program has prepared this Phase I Environmental Site Assessment (Phase I ESA) on the Cats RV property, located on 145 Alder Camp Road, near US Highway 101, near Klamath, California (hereafter referred to as the Site, or Subject Property). This Phase I ESA was prepared for the exclusive use of the Yurok Tribe located in Klamath, California and the United States Environmental Protection Agency (USEPA) Region 9 Brownfields Program.

This Phase I conforms to the principals of ASTM E 1527-05 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM, 2005).

This report is organized as recommended in ASTM E1527-05.

1.1 Purpose

The Purpose of this Phase I ESA is to identify Recognized Environmental Conditions (RECs) associated with the Subject Property. An REC is defined by ASTM as the presence or likely presence of any hazardous substance or petroleum products on a property under conditions that indicate an existing release or a material threat of release of any hazardous substances and petroleum products even under conditions in compliance with law.

This report will include listings of historic RECs if applicable. A historical REC is an environmental condition which, in the past would have been considered a REC, but which may or may not be considered a REC currently.

RECs do not include de minimis conditions that generally would not be subject to any enforcement action if brought to the attention of appropriate agency.

1.2 Detailed Scope of Work

This Phase I ESA conforms to the principals of work described in ASTM E1527-05.

1.3 Significant Assumptions

It is assumed that the groundwater flow direction on the vicinity of the Subject Property is toward the west, towards the Klamath River, based on sloping topography on the vicinity of the Subject Property.

1.4 Limitations and Exceptions

"No environmental site assessment can wholly eliminate uncertainty regarding the potential for the recognized environmental conditions in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with the property" (ASTM, 2005). The information included in this report is based professional opinions from our field reconnaissance and visual observations of the Subject Property and our review and interpretation of available historic information as described in this report.

1.5 Special Terms and Conditions

No special terms or conditions are related to this investigation.

1.6 User Reliance

This report was prepared for the sole and exclusive use of the Yurok Tribe located in Klamath, California and the USEPA Region 9 Brownfields Program. The scope of work performed in this investigation may not be appropriate to satisfy needs of others. Any use of this document and findings as at the sole risk of said user.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The Subject Property is located in unincorporated Del Norte County, north of Highway 169, in the vicinity of the Old Klamath Townsite, California. The parcels are located on the west side of US Highway 101, accessible from Alder Camp Road. The western boundary of the subject properties is bordered by the eastern shores of the Klamath River.

The legal descriptions of the properties are defined as:

PARCEL ONE

The portion of Section 10, Township 13 North, Range 1 East, Humboldt Meridian, as described as follows:

PARCEL "A" as shown on the Parcel Map filed in the office of the County Recorder of Del Norte County, California on January 10, 1984 in Book 5 of Parcel Maps, page 101.

2.2 Site and Vicinity General Characteristics

The Site is accessible from Alder Camp Road, which is a minor artery of Chapman Street, an artery of US Highway 101, in Klamath, California.

Currently the Subject Property consists of developed land. The Site has been developed to accommodate recreational vehicles and overnight tent campers. There are three buildings on the property: two single wide trailers and a single story bath/shower/laundry facility. The Subject Property is relatively flat, though topography in the area slopes slightly to the south, towards the Klamath River.

2.3 Current Use of the Property

The Subject Property is currently used as a seasonal recreational vehicle park with three structures on the Site. The RV Park can accommodate up to 25 recreational vehicles. Two structures are single wide trailers that serve as the park managers quarters and offices. The first is a 60 foot single wide mobile home that is located immediately to the north of the property upon entering the park. The second 60 foot single wide is located adjacent to the first one, again north of the entrance of the park. There is a small wood shed that is adjacent to the second mobile home. The third structure is a shower and restroom facility for the guests of the RV Park. There are two separate restrooms, one each for ladies and men. There are two stalls and two showers in each of the restrooms.

2.4 Description of Structures, Roads, Other Site Improvements

The Subject Property is currently used as a seasonal recreational vehicle park with three structures on the Site. The RV Park can accommodate up to 25 recreational vehicles. Two structures are single wide trailers that serve as the park managers quarters and offices. The first is a 60 foot single wide

mobile home that is located immediately to the north of the property upon entering the park. The second 60 foot single wide is located adjacent to the first one, again north of the entrance of the park. There is a small wood shed that is adjacent to the second mobile home. The third structure is a shower and restroom facility for the guests of the RV Park. There are two separate restrooms, one each for ladies and men. There are two stalls and two showers in each of the restrooms.

2.5 Current Use of Adjoining Properties

The adjacent lands are all vacant, formally developed lands that have been washed out in the 1964 floods. At this time, there are no developments adjacent to the Site. There is the remains of the old Highway 101 Bridge that borders the southern portion of the property.

3 USER PROVIDED INFORMATION

3.1 Title Records

There are no property transactions with the Yurok Tribe currently in process with the Subject Property. Therefore a title report has not been ordered.

Mrs. Tonya Sangrey, Yurok Economic Development Corporation Director indicated that a title search was conducted by the Yurok Tribe at the time the Subject Property was acquired by the Yurok Tribe. Mrs. Sangrey indicated that the title was clear.

3.2 Environmental Liens or Activity Use Limitations

There are no Environmental Liens or Activity and Use Limitations on file for the Subject Properties.

3.3 Specialized Knowledge

During a flooding event in December 1964, the Klamath River rose to a level that destroyed the former Town Site of Klamath. The Subject property was subjected to the flooding event, and as a result may have significant flood debris buried on the property boundary that borders the Klamath River.

3.4 Public Outreach Meeting Results

An essential part of the Phase 1 ESAs is the collection of historical knowledge directly from Yurok Tribal Members about each of the Brownfields sites including this site. Maps and aerial photographs of the Brownfields Sites were provided prior to and during the meetings and the participants were encouraged to note information directly onto the maps and photographs, as well as completing the questionnaires to capture information from the community.

A Public Outreach Meeting was conducted on May 20, 2012, during the Yurok Tribe's quarterly Requa District Meeting. The meeting was hosted by Tribal Councilmember David Gensaw. An attendee list is provided in appendix B. Aerial maps, site pictures, former deeds and parcel maps were made available for the public to view. No participants were able to recall any environmental issues associated with the Subject Property. It was noted that the property was subjected to the same flooding event that occurred in December 1964 that subsequently destroyed the old Klamath Town Site.

3.5 Commonly Known or Reasonably Ascertainable Information

It is commonly known that in December 1964, a flood event occurred in the Klamath River basin. It is also commonly known that the flood event of December 1964 destroyed the entire town of Klamath, as well as adjacent communities. The Subject Property was inundated with flood waters from that flood event. There is evidence of flood debris on the property boundaries that border the Klamath River.

3.6 Valuation Reduction for Environmental issues

The intention of this document is to evaluate the potential impacts of REC's on Tribal Lands within the Yurok Indian Reservation. Any reduction in value of the property is unknown and therefore not relevant to this report.

3.7 Owner, Property Manager and Occupant Information

Mrs. Tonya Sangrey, representative of the Subject Property owner, provided responses to an environmental questionnaire. The completed questionnaire is included in Appendix B. Mrs. Sangrey indicated that the Subject Property is owned by the Yurok Tribe, and is located at 145 Alder Camp Road, Klamath, California.

3.8 Reason for Performing Phase I ESA

The Yurok Tribe, user of this report, indicated that the reason for performing a Phase 1 ESA is to ensure that contamination does not threaten public health and the environment during and after redevelopment of the Site. The Yurok Tribe has selected this Site to be evaluated under the USEPA Brownfields Program.

4 RECORDS REVIEW

4.1 Standard Environmental Record Sources

Yurok Tribe Environmental Program has contracted with Environmental Data Resources (EDR), a company that specializes in the acquisition and compilation of local, state and federal environmental records, to acquire the ASTM required records. EDR has provided a Radius Map Report, which is provided in Appendix C. EDR searched the Subject Property and surrounding area for standard environmental records as required by ASTM E1527-05. A complete listing of the databases searched and the radius searched are included in the EDR Radius map report.

- Yurok Indian Reservation does not have a listed address and are on the “Indian Reservation” database indicating the presence of Indian administrated lands that have an area greater than or equal to 640 acres.

4.2 Additional Environmental Record Sources

No additional Environmental Record Sources in addition to those listed in Section 4.1 were available for review.

4.3 Physical Setting Sources

The 1997 United States Geological Survey (USGS) 7.5 minute map titled Requa, California, which includes the Subject Property and surrounding areas, was reviewed and is included in Figure 3. The Subject Property has an elevation of 10 feet above mean sea level. The Subject Property is in a flat area that is located on a flat river bar. The topography of the area around the Subject Property slopes southwest. The nearest streams shown on the USGS topographic map are Salt Creek, which flows north to south and empties in the Klamath River; Mynot Creek, which flows northeast to southwest and empties into Spruce Creek; Spruce Creek, which flows south to north and empties into the Klamath River; Richardson Creek, which flows southwest to northeast and empties into the Klamath River; Hunter Creek, which flows east to west and empties into the Klamath River. The Klamath River flows from south to northwest and borders the western boundary of the property.

4.4 Historical Use Information on the Property

Information in this section of the report is based on acquisition and review of various historical sources, including historic aerial photographs, historic topographic maps, and interviews with local officials. City directory data and Sanborn Fire insurance maps were not available with coverage for the Subject Property.

4.4.1 EDR Historic Aerial Photographs

- 1964: From this photograph, the property has several visible unimproved roads that border and bisect the property. No structures are identifiable in this aerial photograph.
- 1974: From this photograph, no roads or structures are identifiable in this aerial photograph.

- 1982: From this photograph, the property has several visible unimproved roads that border and bisect the property. A small structure is identifiable in this aerial photograph.
- 1993: From this photograph, the property has several unimproved roads that border and bisect the property. No structures are identifiable in this aerial photograph.
- 1998: From this photograph, the property has several unimproved roads that border and bisect the property. Visible are several RVs parked throughout the Site, as well as what appears to be two small buildings on the northern edge of the Site.
- 2005: From this photograph, the property has several unimproved roads that border and bisect the property. Visible are several RVs parked throughout the Site.

4.4.2 Other Historic Photographs

A historic aerial photograph from Del Norte County, taken in 1962, shows the Subject Property without the improved roads that are seen in later aerial photographs (EDR Historic Aerial Photographs Cats RV 145 Alder Camp Road: 1964, 1974, 1982, 1993, 1998, 2005). There appears to be a boat dock located on the eastern portion of the property, and is extending into the Klamath River.

4.4.3 Historic Topographic Maps

Historic topographic maps from 1947, 1952, 1966, and 1997 were provided by EDR. Copies of the historic topographic maps are included in Appendix E. The topographic maps were reviewed and the following observations were made:

- 1947: There are no structures or streets visible within the Subject Property on this topographic map. The location of the Subject Property is located in an area on the map labeled "Klamath". Visible on the map is a sawmill site labeled "Klamath Cedar Co.". The "Klamath Cedar Co." sawmill is located north of the Subject Property.
- 1952: On this topographic map, there appear to be several structures in the vicinity of the Subject Property, including many buildings and developed roads. The location of the Subject Property is located in an area on the map labeled "Klamath". Visible on the map is a sawmill site labeled "Sawmill". The "Sawmill" is located north of the Subject Property.
- 1966: In this map, the preexisting streets and buildings are no longer visible. It is presumed that the town site of Klamath was completely decimated by the December 1964 flood event. There is one road in the vicinity of the Site that runs north of the Subject Property. There is one visible structure that is located east of the Subject Property.
- 1997: In this map, there are several roads in the vicinity of the property that are visible. There is a boat dock labeled on the map that appears to be adjacent to the Subject Property. There is one visible structure that is located east of the Subject Property.

4.4.4 Historic City Directories

Historic city directory was not available with coverage for the town of Klamath. Documentation of the lack of coverage is included in Appendix F.

4.4.5 Sanborn Fire Insurance Maps

Historic Sandborn Fire Insurance Maps were not available with coverage for the town of Klamath. Documentation of the lack of coverage is included in Appendix G.

4.5 Historical Use Information on Adjoining Properties

Based on historical information, the adjacent properties have remained vacant and undeveloped since the time of the 1964 flood. Prior to the flood, there were numerous businesses, including taverns, restaurants, fuel stations, motels and stores.

4.6 Data Failure

Historical records tracking the development for the Subject Property date back to 1958. Topographic maps of the region date back to 1947. The earliest development for this property is shown in the 1947 Klamath Topographic Quad. The County Of Del Norte County's property records date back to 1958. The available historical data fails to identify the historical uses of the property prior to 1947. This creates a data gap between the years 1940 and 1947. Historic records indicate the modern town of Klamath was first developed in 1851, then was abandoned in 1852. It was reestablished in 1926, and was flooded in 1955 and 1964. After the 1964 flood, most of the town's inhabitants left.

5 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

The Subject Property was inspected by Ray Martell, Assistant Director, and Emery Mattz, Environmental Protection Specialist, of the Yurok Tribe Environmental Program on June 28th, 2012. There was a maintenance crew from the Yurok Tribe present at the time of the inspection . Photographs from the Site inspection are included in Appendix H.

5.2 General Site Settings

Currently the Subject Property consists of developed land. A large portion of the land has been developed to accommodate recreational vehicles and overnight tent campers. There are three buildings on the property: two single wide trailers and a single story bath/shower facility. The Subject Property is relatively flat, though topography in the area slopes slightly to the west, towards the Klamath River.

5.3 Exterior Setting

Currently the Subject Property consists of developed land. A large portion of the land has been developed to accommodate recreational vehicles and overnight tent campers. This includes 25 spaces for RV's that each have electricity, water and sewer services. There are three buildings on the property: two single wide trailers and a single story bath/shower facility. The first single wide trailer serves as a maintenance storage facility. There are tools and the necessary items needed to support a RV park. The second single wide trailer is the manager's office/living quarters. The third structure is a permanent structure that housed the men's and ladies restroom facility. Each facility has two sinks, two stalls and two showers. There is a janitorial room that separates the two facilities. There is an existing septic system that consists of two independent systems that collectively serve the entire Site. There are two power poles on the property that are fed from one main transmission pole located to the south of the Subject Property. The transmission pole is located adjacent to the Site, and has a transformer on the pole. It is not known if the transformer is PCB free.

5.4 Interior Observations

There are three buildings on the property: two single wide trailers and a single story bath/shower facility. The first single wide trailer serves as a maintenance storage facility. There are tools and the necessary items needed to support a RV park. The second single wide trailer is the manager's office/living quarters. The third structure is a permanent structure that housed the men's and ladies restroom facility. Each facility has two sinks, two stalls and two showers. There is a janitorial room that separates the two facilities

6 INTERVIEWS

6.1 Interviews with Owners

Mrs. Tonya Sangrey, representative of the Subject Property owner, provided responses to an environmental questionnaire. A copy of the questionnaire is located in Appendix B. Mrs. Sangrey indicated that the Subject Property is owned by the Yurok Tribe, and is located on Alder Camp Road, in the vicinity of the town of Klamath, California. She indicated that there were no occupants on the Subject Property; however there was a maintenance crew at the site that was preparing the site for the upcoming tourist season. The maintenance crew was provided by the Yurok Tribe.

6.2 Interview with Site Manager

There was no site manager available during the time of this report.

6.3 Interviews with Occupants

There were no occupants during the initial Site visit.

6.4 Interviews with Local Government Officials

A Public Outreach Meeting was conducted on May 20, 2012, during the Yurok Tribe's quarterly Requa District Meeting. The meeting was hosted by Tribal Councilmember David Gensaw. An attendee list is provided in appendix B. Aerial maps, site pictures, former deeds and parcel maps were made available for the public to view. No participants were able to recall any environmental issues associated with the Subject Property. It was noted that the property was subjected to the same flooding event that occurred in December 1964 that subsequently destroyed the old Klamath Town Site.

7 FINDINGS

The assessment has not identified any environmental findings.

8 OPINION

Qualifications of the environmental professionals that prepared this report are included in Appendix H.

9 CONCLUSIONS

We have performed a Phase 1 Environmental Site Assessment in conformance with the scope and limitations of ASTM E 1527-05 at the Subject Property, located on (*location*) (*APN*), near (*town*), California. Any exceptions to, or deletions from, this practice are described in Section 2 of this report. This assessment has revealed the following recognized environmental conditions in connection with the property:

This assessment not reveled any recognized environmental conditions or any historical recognized environmental conditions in connection with the property.

10 DEVIATIONS

There were no significant deviations from ASTM E 1527-05.

11 ADDITIONAL SERVICES

No additional environmental services were provided under this contract.

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 01/20/2012 has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

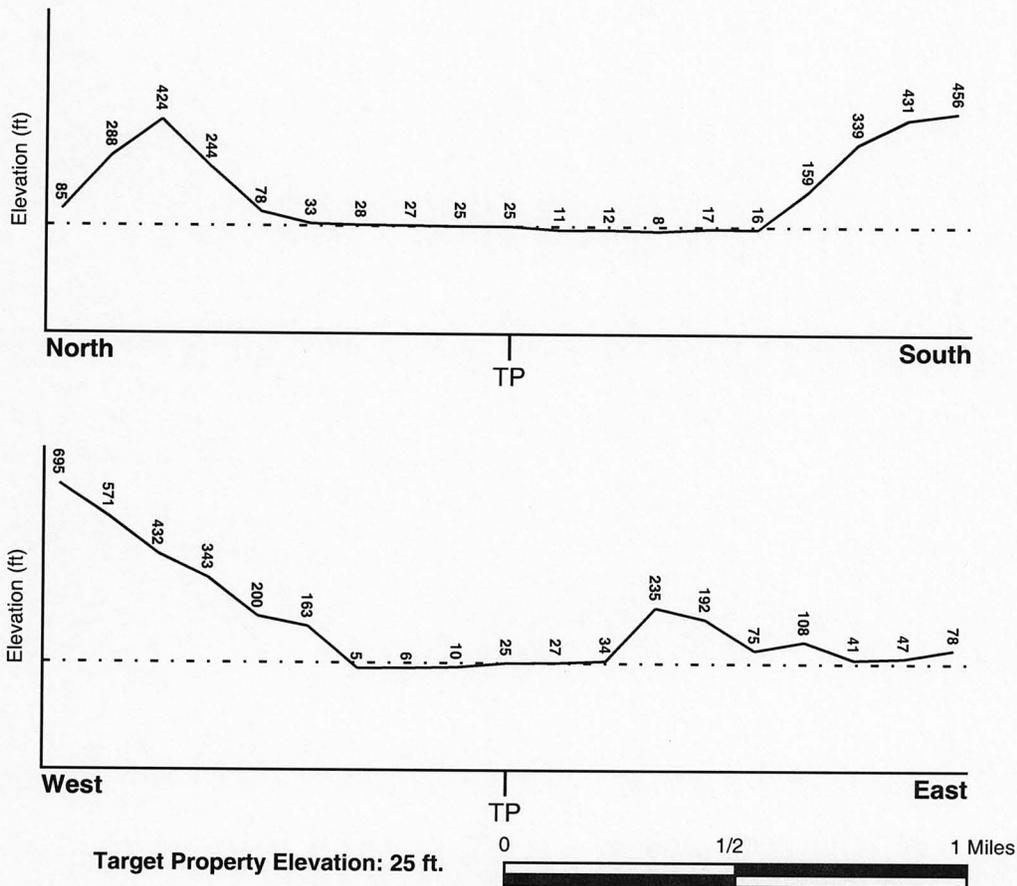

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BIGRIVER

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
very gravelly - sand
loamy sand

Surficial Soil Types: silt loam
very gravelly - sand
loamy sand

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.
