

## Inconsistent application:

In applying the level of protection analysis to

← **Dungeness crab**, the MLPA staff departed from its claimed assumptions by considering:

- Commercial take numbers
- Restrictions of female
- Population abundance

Oops!

Didn't apply the **Native American Standard** to **Dungeness crab**!

Oops!

Didn't apply the **Native American Standard** to **Surf smelt**!

Oops!

Didn't apply the **Native American Standard** to **Spearfishing**!

The Native American standard did apply to **rock crabs**, which receive a **low** level of protection. (Congratulations, rocky!)
