We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of AASTM E1527-13 at the Subject Property, located on Johnson Road, APN 533-064-015, near Weitchpec, California. This assessment has revealed the following conditions in connection with the Subject Property:

• Former use of the Subject Property as an illegal Cannabis grow site that utilized gasoline and diesel for generation of commercial scale lighting, has in numerous, scattered sites stained the soil and represents environmental contamination that rises to an enforcement level of concern.

In our opinion, the above stated conditions, including petroleum and petroleum products would be considered Recognized Environmental Conditions (RECs). The following report will outline the procedures used during this Site Assessment, the physical findings, the historical findings, and present uses of the property.

# **INTRODUCTION**

The Yurok Tribe Environmental Program (YTEP) has prepared this Phase I Environmental Site Assessment (Phase I ESA) on Jason Lee's RRR property, located on Johnson Road, within the external boundaries of the Yurok Indian Reservation, near Weitchpec, California (hereafter referred to as the Site, or Subject Property); lying at 41.3305850 North latitude by 123.8744280 West longitude. See Figure 1 Site Location Map for reference. This Phase I ESA was prepared for the exclusive use of the Yurok Tribe located in Klamath, California and the United States Environmental Protection Agency (US EPA) Region 9 Brownfields Program.

This Phase I conforms to the principals of ASTM E 1527-13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM, 2013) and is organized as recommended in ASTM E1527-13.

## **1.1 Purpose**

The Purpose of this Phase I ESA is to identify Recognized Environmental Conditions (RECs) associated with the Subject Property. An REC is defined by ASTM as the presence or likely presence of any hazardous substance or petroleum products on a property under conditions that indicate an existing release or a material threat of release of any hazardous substances and petroleum products even under conditions in compliance with law.

This report will include listings of historic RECs if applicable. A historical REC is an environmental condition which, in the past would have been considered a REC, but which may or may not be considered a REC currently.

RECs do not include de minims conditions that generally would not be subject to any enforcement action if brought to the attention of appropriate agency.

# **1.2 Detailed Scope of Work**

This Phase I ESA conforms to the principals of work described in ASTM E1527-13.

# 1.3 Significant Assumptions

It is assumed that the groundwater flow direction on the vicinity of the Subject Property is toward the east towards the Klamath River (approximately 0.6 miles) based on sloping topography in the vicinity of the Subject Property.

# **1.4 Limitations and Exceptions**

"No environmental site assessment can wholly eliminate uncertainty regarding the potential for the recognized environmental conditions in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with the property" (ASTM, 2013). The information included in this report is based professional opinions from our field reconnaissance and visual observations of the Subject Property and our review and interpretation of available historic information as described in this report.

# 1.5 Special Terms and Conditions

No special terms or conditions are related to this investigation.

## 1.6 User Reliance

This report was prepared for the sole and exclusive use of the Yurok Tribe located in Klamath, California and the USEPA Region 9 Brownfields Program. The scope of work performed in this investigation may not be appropriate to satisfy needs of others. Any use of this document and findings as at the sole risk of said user.

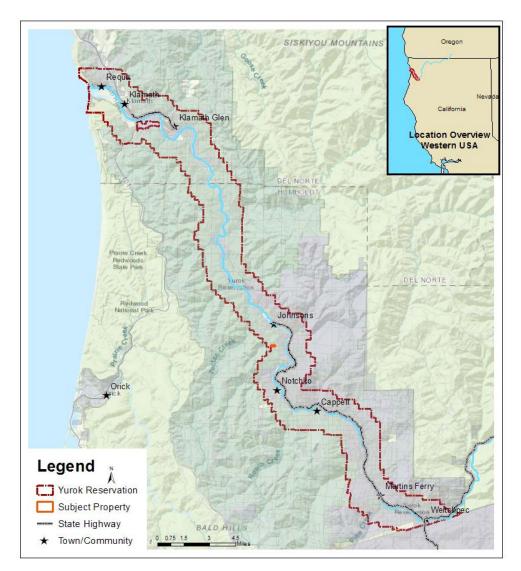

Figure 1 Site Location Map

# **2** SITE DESCRIPTION

# 2.1 Location and Legal Description

The Subject Property lies on a north north-east slope within the Coastal Mountain Range at 1096 feet above mean sea level; approximately 10.75 miles east of the boundary with the Pacific Ocean; 0.6 miles west of the Klamath River; and 0.2 miles southwest of Johnson Creek, the closest perennial surface water.

Legal Description: All that certain piece or parcel of land being the South Half of the South Half of the Northwest Quarter of the Northeast Quarter of Section 19, Township 11 North, Range 3 East, Humboldt Base and Meridian, situate and lying within the Yurok Indian Reservation, in the County of Humboldt, State of California.

# 2.2 Site and Vicinity General Characteristics

The Site is accessible from Johnson Road, which bi-sects the property and is a major artery of Bald Hills Road, an artery of Highway 101, near Orick, California. The Subject Property is currently vacant, developed land on the Yurok Indian Reservation with a single dwelling and numerous small outbuildings/sheds.

The Site is predominantly forested with several clearings for agricultural crops that are abandoned and now covered in wild plants and invasive vegetation. The properties surrounding the Site are rural residential and undeveloped forest lands. The surrounding area is generally mountainous, situated within Coastal Mountains. The Klamath River lies approximately 0.6 miles to the east of the property.

# 2.3 Current Use of the Property

The Property has been abandoned and is vacant.

# 2.4 Description of Structures, Roads, Other Site Improvements

The Property appears to have been timberland, cleared to develop a small agricultural field behind/beyond an unfinished 2 bedroom, one bath single family dwelling of stud construction. The interior of the home is open to the studs and has been wired with multiple timers and what appears to be commercial grade 'grow-lights'.

The home is accessed by a single lane driveway off Johnson Road. 300 feet, adjacent to the home is a small (8 X10 ft) cinderblock outbuilding for housing a generator. An above ground fuel oil tank is housed in a covered area outside and to the rear of the outbuilding. Waterlines appear to run to a nearby creek for domestic water supply.

# 2.5 Current Use of Adjoining Properties

There are four adjoining properties that border the subject property. The properties to the north (APN 533-064-017) and east (APN 533-064-003) of the Subject Property are in private ownership as rural residences. The property to the east is owned by the Yurok Tribe and is currently

undeveloped land. The property to the south of the Subject Property is owned by the Green Diamond Resource Company. It is currently managed as industrial timber land. The Properties beyond the contiguous boundaries are predominantly timber and rural residential parcels. Figure 2 Parcel Map may be referenced below.

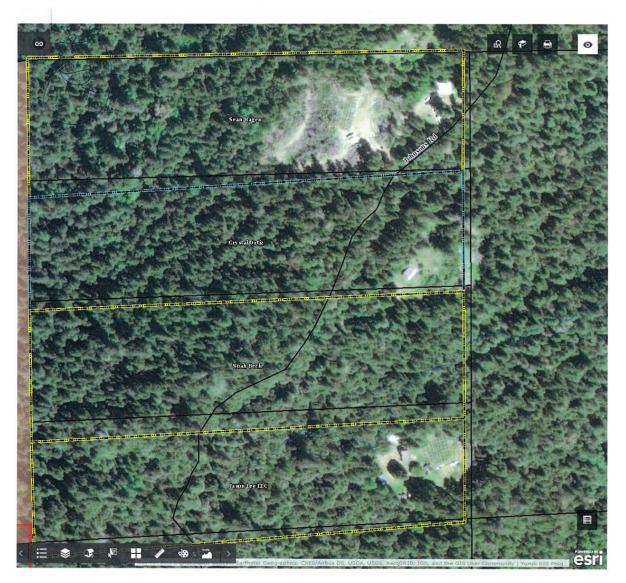

Figure 2 Parcel Map

# **3 USER PROVIDED INFORMATION**

## 3.1 Title Records

There are no property transactions with the Yurok Tribe currently in process with the Subject Property. Therefore a title report has not been ordered.

## 3.2 Environmental Liens or Activity Use Limitations

There are no Environmental Liens or Activity and Use Limitations on file for the Subject Property. Documentation can be found in Appendix H.

## 3.3 Specialized Knowledge

No specialized knowledge was acquired regarding the Subject Property.

## 3.4 Public Outreach Meeting Results

An essential part of the Phase 1 ESAs is the collection of historical knowledge directly from Yurok Tribal Members about environmental contaminants within the Yurok Ancestral Territory. In 2010 maps and aerial photographs were provided prior to and during meetings and the participants were encouraged to note information directly onto the maps and photographs, as well as completing the questionnaires to capture information from the community. These were compiled into a database and associated map layers using ArcGIS and housed within the Yurok Tribe Environmental Program's shared computer drive.

A search of the Environmental Contaminant database was made as a part of this ESA and no community concerns, references, or contaminants were listed for the Subject Property APN or immediate vicinity.

# 3.5 Commonly Known or Reasonably Ascertainable Information

It is commonly known that the Property was utilized for illegal Cannabis cultivation and that there were enforcement actions taken against the owner. The Owner, Jason Lee has entered the property into the Humboldt County's Retirement, Remediation, and Relocation (RRR) Program, a county effort to mitigate adverse environmental effects from cultivation operations occurring in marginal and environmentally challenging sites (for example, surface water diversion without water right or on parcels with slopes in excess of 15%).

# 3.6 Valuation Reduction for Environmental issues

The intention of this document is to evaluate the potential impacts of REC's on Tribal Lands within the Yurok Indian Reservation. Any reduction in value of the property is unknown and therefore not relevant to this report.

## 3.7 Owner, Property Manager and Occupant Information

The Property is abandoned with no occupant or known manager.

# 3.8 Reason for Performing Phase I ESA

YTEP, user of this report, indicated that the reason for performing a Phase 1 ESA is to ensure that contamination does not threaten public health and the environment during and after redevelopment of the Subject Property. The Yurok Tribe has selected this property to be evaluated under the US EPA Section 128(a) Tribal Response Program.

# **4 RECORDS REVIEW**

# 4.1 Standard Environmental Record Sources

YTEP has contracted with Environmental Data Resources (EDR), a company that specializes in the acquisition and compilation of local, state, and federal environmental records, to acquire the required records. EDR searched the Subject Property and surrounding area for standard environmental records as required by ASTM E1527-13 and the Subject Property is not listed on any of the databases reviewed by EDR. A complete listing of the databases searched and the radius searched are included in the EDR Radius Map Report, provided in Appendix B.

No other sites were listed within one mile radius of the Subject Property in the EDR report.

# 4.2 Additional Environmental Record Sources

The Yurok Tribe Environmental Program's Environmental contaminant and illegal dump databases were searched and no reference to the Property or adjoining properties was found.

# 4.3 Physical Setting Sources

The Subject Property has an elevation range from approximately 1096 feet above mean sea level. It is predominantly mixed use forest land that with a small 3-5 acre clearing for agricultural purposes. The topography in the area around the Subject Property generally slopes to the east, toward the Klamath River. The nearest stream shown on the USGS topographic map is Johnson Creek which flows 0.2 miles, northwest of the Subject Property. Soils are considered a clay loam with poor drainage capacity with the water table siting at a depth of 1 to 3 feet. Depth to bedrock is approximately 60 inches.

# 4.4 Historical Use Information on the Property

Information in this section of the report is based on acquisition and review of various historical sources, including historic aerial photographs, historic topographic maps, and interviews with local officials. City directory data and Sanborn Fire insurance maps were not available with coverage for the Subject Property. Documentation is available in Appendix E and F.

## 4.4.1 EDR Historic Aerial Photographs

- 1954- The Property is delineated on this aerial that shows what appears to be mature forest with no clearings or structures present.
- 1975- This aerial is pale, under exposed and taken at time with strong shadows. Johnson Road is visible running through the vicinity with scattered clearings but no structures.
- 1983- Johnson road is visible running north-south through the photo as it moves through different aged vegetation/forest. There are scattered clearing through but no apparent structures. The clearings appear associated with logging landings.
- 1988- This aerial is not focused, with large scale, granular quality and although splotches of light and dark are visible it is impossible to decipher details.

- 1993- Two photos were examined from this year. One is of very poor quality making details difficult to impossible to discern. Only Johnson Road is recognizable. A second aerial is of better quality and Johnson Road is visible running in a north –south direction through the Property. Two small clearing are present in this aerial photo with the larger clearing to the south west corner with several small structures.
- 2005- The property is forested with no visible structures. Johnson's Road is demarked running through the property in a north-south direction and with either a road, or stream course creating a shadow running from the middle of the property, east to west.
- 2009- The property and general area remains predominantly forested however there a clearing scattered though out the adjoining properties. In the south-west corner of the Property there is a clearing and what appears 2-3 small structures. In the western top half quadrant of the Property there is a small clearing with a distinct bright green color of new vegetation with possibly an adjacent structure.
- 2012- Johnson road appears to be improved and clearly visible running south to north on this aerial. The clearing in the south west corner of the Property has been expanded and bare earth is visible and numerous, scattered building. Patches of bright green vegetation are scattered throughout.
- 2016- Johnson road is still visible but either shadow or increased age of the forested edges has obscured the southern half of the road as it moves through the Property. The clearing at the south west corner remains and several structures are visible, however most of the exposed earth seen in the 2012 areal is now vegetated.

# 4.4.2 Historic Topographic Maps

- 1925- This map shows Johnson Road bisecting the Property. The Yurok Reservation's exterior boundary is drawn and the parcel is within the Reservation and shares its western boundary.
- 1945- The map shows that Johnson Road travels through the Property in a north-south direction, nearly bisecting the parcel.
- 1947- The Property remains the same as in the 1945 map.
- 1952-The Property remains the same as in the 1947 map.
- 1982-83- The distinguishing feature on this topo is Johnson road. A spur off Johnson Road is visible in this year's map that begins north of the Property, cuts south and travels through the Property. It is drawn as a 'dashed' seasonal road.
- 1997- Characteristics of the Property remain the same as in the 1983 map.
- 2012- This topo shows Johnson Road that nearly bisects the parcel and the lateral spur that begins north of the Property but travels south through it is now marked as a developed road. No structures are drawn.

## 4.4.3 Historic City Directories

Historic city directory data was not available with coverage for the subject property or any known cross streets. Documentation is included in Appendix E.

## 4.4.4 Sanborn Fire Insurance Maps

Historic Sanborn Fire Insurance Maps were not available with coverage for the Subject Property. Documentation is included in Appendix F.

## 4.5 Data Failure

Historical records tracking the Subject Property date back to 1925. Therefore there are no data gaps.

# **5 SITE RECONNAISSANCE**

# 5.1 Methodology and Limiting Conditions

The Subject Property was inspected by Suzanne Fluharty and Koiya Tuttle of the Yurok Tribe Environmental Program on May 11, 2018. Photographs from the Site inspection are included in Appendix H. There were no Limiting Conditions at the time of the site visit except for the usual restraints of the vicinity such as steep terrain in some areas and vegetative over growth of blackberry vines.

## 5.2 General Site Settings

The Subject Property lies on a north north-east slope within the Coastal Mountain Range at 1096 feet above mean sea level; approximately 10.75 miles east of the boundary with the Pacific Ocean; 0.6 miles west of the Klamath River; and 0.2 miles southwest of Johnson Creek, the closest perennial surface water. Except for the clearing for the house, outbuildings, and adjacent fields it is mature timberland with mixed conifers the predominant cover. Photo documentation is provided in Appendix G.

Existing conditions include scattered debris and piles of unused building materials, solid waste, abandoned vehicles, broken and discarded diesel generators and spend agricultural Cannabis supplies, fertilizers, and soil.

## 5.3 Exterior Setting

In general, the house is one of dis-repair, unpainted and unfinished condition. It appears a stud, frame construction with plywood sheathing. The immediate area and clearing is cluttered with abandoned debris. Photo documentation is provided in Appendix G.

## **5.4 Interior Observations**

The walls in the interior of the house have been stripped to the studs and then rigid insulation board installed and left open to interior. Large vents and multiple breaker boxes are installed but the ventilation fans were missing. Florescent and halogen lighting fixtures were scattered about along with miscellaneous ballasts and batteries. There was a single bathroom that from the evidence of fixture staining and partially empty fertilizer containers, had been used to mix fertilizers and hydroponic solutions. In the condition at the time of the inspection, it is un-inhabitable. Photo documentation is provided in Appendix G.

# **6 INTERVIEWS**

## 6.1 Interviews with Owners

The Subject Property is abandoned and vacant. No interviews were held.

## 6.2 Interview with Site Manager

The Subject Property is abandoned and vacant. No interviews were held.

## 6.3 Interviews with Occupants

The Subject Property is abandoned and vacant. No interviews were held.

# 6.4 Interviews with Local Government Officials

On August 20, 2018 Mr. Koiya Tuttle, Pollution Prevention Division Manager for the Yurok Tribe Environmental Program was interviewed regarding the Subject Property. He had inspected the property along with members of the Yurok Cannabis Task Force to determine the costs of environmental clean-up and to determine if it was in compliance for entering into the Humboldt County Retirement, Remediation, and Relocation (RRR) Program, a county effort to mitigate adverse environmental effects from cultivation operations occurring in marginal and environmentally challenging sites (for example, surface water diversion without water right or on parcels with slopes in excess of 15%).

He stated that the property was in a state of extreme stress and his calculations for clean-up estimated that approximately \$70,000 would be required. A primary concern was for the numerous areas where staining of the soils appeared to be from petroleum and petroleum products, both around locations where generators were apparently located and associated with the abandoned vehicles, both automobiles and mobile homes.

# **7 FINDINGS**

The assessment has identified the following environmental findings: a large quantity of solid waste including hazardous materials (batteries, lighting ballasts, and barrels/tanks of unknown liquid mixtures) and areas of petroleum/petroleum product use and release.

# **8 OPINION**

# 8.1 Recognized Environmental Concerns and Historic Recognized Environmental Concerns:

Based on information obtained from this investigation, petroleum products were used in various locations on the Subject Property and the potential exists for subsurface impact from petroleum compounds. In addition, although significant staining is not present around or under the various ballasts and batteries their age and condition is such that release of acids and coolant chemicals that might contain PCB's and other compounds is imminent.

It is my opinion that these would likely rise to the level of regulatory enforcement and for this reason these conditions should rise to the level of Recognized Environmental Concerns (RECs). In my opinion, additional testing should be performed during and/or after clean-up of the property.

# 8.2 Opinion Regarding Additional Appropriate Investigation:

The *obvious* presence or likely presence of contamination at the Subject Property, based on the REC's outlined in section 8.1, it is the opinion of this environmental professional that addition appropriate investigations be considered and conducted. Qualifications of the environmental professionals that prepared this report are included in Appendix H.

# **9 CONCLUSIONS**

We have performed a Phase 1 Environmental Site Assessment in conformance with the scope and limitations of ASTM E 1527-13 at the Subject Property, located on (*location*) (*APN*), near (*town*), California. Any exceptions to, or deletions from, this practice are described in Section 2 of this report.

This assessment has revealed the following recognized environmental conditions in connection with the property:

1) Environmental releases of petroleum and petroleum products from abandoned vehicles and associated use of diesel, gasoline, and possibly fuel oil generators.

2) Potential for imminent release of hazardous substances from broken, stock piled, and mis-used batteries and electrical equipment, particularly ballasts from industrial florescent and halogen lighting fixtures.

# **10 DEVIATIONS**

There were no significant deviations from ASTM E 1527-13.

#### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

INDIAN RESERV: This map layer portrays Indian administered lands of the United States that have any area equal to or greater than 640 acres.

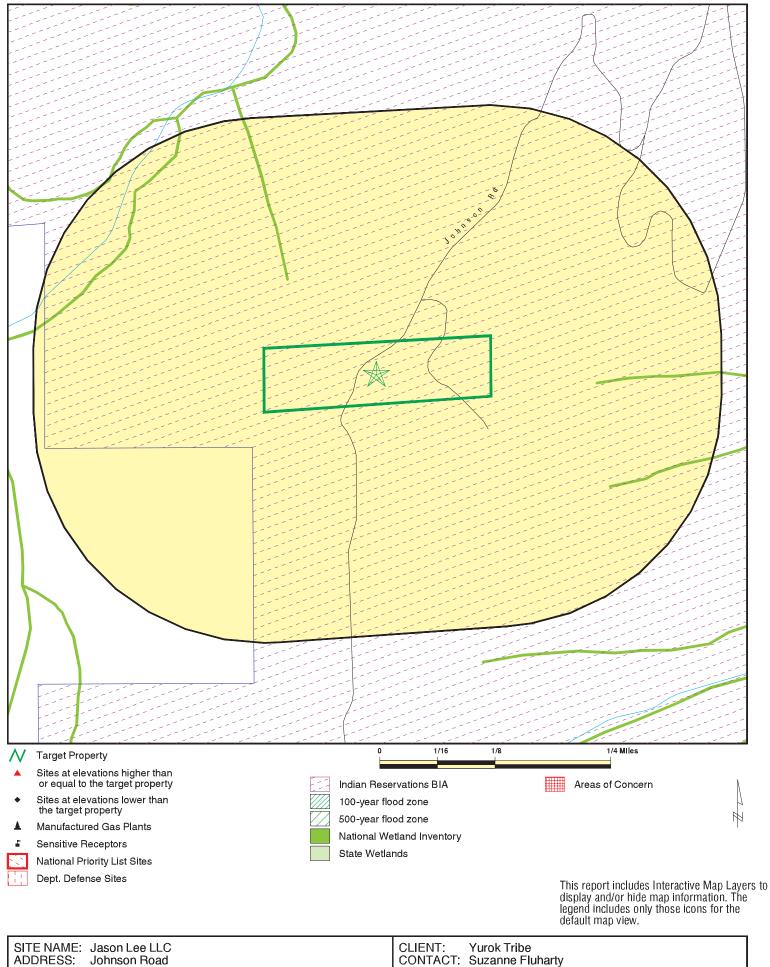

A review of the INDIAN RESERV list, as provided by EDR, and dated 12/31/2014 has revealed that there is 1 INDIAN RESERV site within approximately 0.001 miles of the target property.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

### Federal NPL site list

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

### Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

### Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016 Date Data Arrived at EDR: 01/05/2017 Date Made Active in Reports: 04/07/2017 Number of Days to Update: 92 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 07/06/2018 Next Scheduled EDR Contact: 10/15/2018 Data Release Frequency: Varies

#### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

#### Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

#### ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

### Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

#### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

#### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

#### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## EDR HIGH RISK HISTORICAL RECORDS

#### EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## **OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- Groundwater flow direction, and
   Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

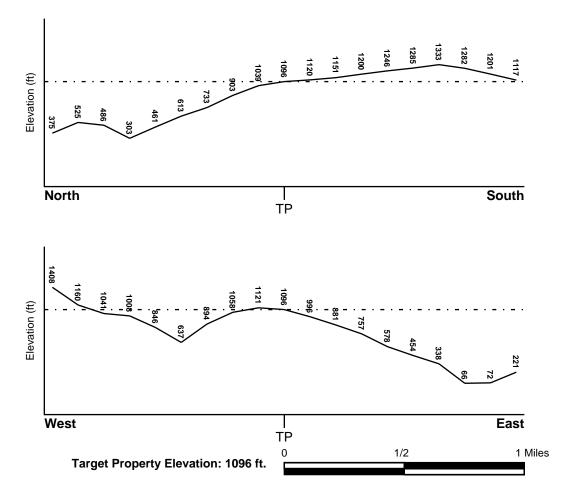

## **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:		
Search Radius:	1.25 miles	
Status:	Not found	

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

## **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

## **ROCK STRATIGRAPHIC UNIT**

## **GEOLOGIC AGE IDENTIFICATION**

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	ATWELL
Soil Surface Texture:	clay loam
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Somewhat poorly. Soils commonly have a layer with low hydraulic conductivity, wet state high in profile, etc. Depth to water table is 1 to 3 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

## HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## **EXECUTIVE SUMMARY**

#### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

#### **RECORD SOURCES**

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

#### **RESEARCH SUMMARY**

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;

Date: 1/12/15

**Luis Romero** being first duly sworn, each for himself and/or herself, depose and says: That he/she/they are identical parties who made, executed and delivered that certain Deed in Lieu of Foreclosure to Jason R. Lee, LLC, a California limited liability company dated December 15, 2014 ("Deed"), conveying the following described real property in the unicorporated area, County of Humboldt, State of California, to-wit (the "Property"):

### AS DESCRIBED IN EXHIBIT B ATTACHED HERETO.

The affiant(s) now are, and at all times herein mentioned were single;

That the Deed is intended to be and is an absolute conveyance of the title of the Property to the grantee(s) named therein, and was not and is not now intended as a mortgage, trust conveyance, or security of any kind; that it was the intention of affiant(s), as grantor(s) in the Deed to convey, and by the Deed affiant(s) did convey, to the grantee(s) named therein all his/her/their right, title and interest absolutely in and to the Property; that possession of Property has been surrendered to the grantee(s);

That, in the execution and delivery of the Deed, affiant(s) were not acting under any misapprehension as to the effect thereof, and acted freely and voluntarily and was not acting under coersion or duress;

That the consideration for the Deed was and is payment to affiant(s) of the sum of 170,000.00 ("Consideration"), by grantee(s), and the full cancellation of all debts, obligations, costs, and charges secured by that certain Deed of Trust heretofore existing on the Property executed by Luis Romero, as Trustor(s), to Humboldt Land Title Company, as Trustee, for Jason R.
